SKILLS

- **Languages:** C, C++, Java, Python, SQL, JavaScript, DSA,
- **Frameworks:** HTML/CSS, TensorFlow, TFLite, wxWidgets, Streamlit
- **Tools & Platforms:** MySQL, Linux, Git, GitHub, VS code, Power Bi
- **Soft Skills:** Performance-Driven, Strategic Troubleshooter, Collaborative Leader, Process-Oriented

PROJECTS

Enterprise RAG Platform | [LINK](#)

Jun'26-Aug'26

- Designed an Enterprise RAG Platform end-to-end from core foundations to production optimization using LangChain, FastAPI, and multi LLM backends (Gemini, OpenAI, Ollama), containerized with Docker Compose and deployed on AWS via GitHub Actions CI/CD pipeline.
- Integrated ChromaDB, FAISS, and Pinecone as a progressive vector storage layer with Sentence Transformers for semantic embeddings and PyMuPDF for multi format document ingestion; backed by PostgreSQL for metadata and LangSmith for end to end tracing and observability.
- Evaluated RAG pipeline quality using RAGAS metrics faithfulness, answer relevancy, and context precision alongside a pytest suite and real-time analytics dashboard, delivered a Streamlit and React/Next.js frontend with full agentic orchestration via LangChain.

Tech Stack : Python, FastAPI, LangChain, ChromaDB, PostgreSQL, Docker, GitHub Actions, AWS, RAGAS, LangSmith

LexiNLP – Intelligent Word Normalization & Segmentation Platform | [LINK](#)

Jun'26-Aug'26

- Developed a full-stack NLP application using FastAPI and React (Vite) to perform word normalization and unsupervised word segmentation through an interactive, responsive web interface.
- Designed and integrated RESTful APIs to connect the frontend with the NLP processing pipeline, enabling real-time text analysis with a modular and scalable application architecture.
- Implemented an end to end NLP workflow by combining Python-based language processing modules with a modern React frontend, improving code maintainability, user experience, and extensibility for future NLP tasks.

Tech Stack : Python, FastAPI, React.js, Vite, JavaScript, HTML5, CSS3, REST API, Morfessor, Gensim, NumPy

AI and ROI Analytics Dashboard | [LINK](#)

Feb'26– Mar'26

- Developed an interactive data analytics dashboard to visualize Forbes Billionaires data using advanced filtering, ranking, and comparative insights to support quick decision-making and trend analysis.
- Implemented automated data extraction, cleaning, and transformation pipelines to maintain accurate, real-time billionaire profiles, net-worth trends, geographic distribution, and sector-wise analysis.
- Designed and deployed dynamic visualizations and predictive models using Power BI to uncover patterns in wealth growth

Tech Stack : Excel, Python, SQL, Power BI

TRAINING

Master DSA With Java [Angaar Batch]

Jul'25 – Aug'25

- Gained hands-on mastery of Java, OOPs, STL, pointers/reference handling, memory management, and modular code design through intensive training.
- Solved 100+ problems on LeetCode and HackerRank, reducing average code runtime by 30% and consistently improving time complexity from $O(n^2)$ to $O(n \log n)$.
- Developed strong problem-solving speed under time constraints as displayed in Hackathon.

Certificate: [LINK](#)

CERTIFICATIONS

- Internet of Things-NPTEL-[LINK](#)
- Oracle Certified Foundations Associate - [LINK](#)

Oct'25

Apr'26

ACHIEVEMENTS & VOLUNTEERING

Oracle Cloud Infrastructure Foundations Associate

Apr'26

Earned an industry-recognized Oracle certification demonstrating foundational knowledge of cloud computing concepts, Oracle Cloud Infrastructure services, security, networking, and cloud architecture principles.

Badge Link - [LINK](#)

Binary Blitz - Web Hackathon

Mar'24

Led my team in a university hackathon, guiding development and creating a functional, well-designed web page while coordinating tasks and ensuring smooth project execution under time constraints.

Certificate-[LINK](#)

Leadership & Campus Involvement

Volunteered in coordinating and supporting group project presentations, ensuring smooth execution and effective team collaboration.

EXTRA CURRICULAR ACTIVITIES

- Attended multiple technical workshops at LPU on full-stack development, MERN fundamentals, and industry practices.
- Participated in university-level tech seminars and guest lectures covering software engineering, AI and ML concepts, and career readiness in tech.
- Engaged in coding webinars and hackathon-orientation sessions, gaining exposure to Strategic Troubleshooting strategies and real-world development workflows.

EDUCATION

- | | |
|--|--|
| • Lovely Professional University
Bachelor of Technology - Computer Science and Engineering; CGPA: 6.56 | Punjab, India
Aug'23 |
| • ODM International School
Senior Secondary; Percentage-81% | Bhubaneswar, Odisha
Apr'20 – Mar'22 |
